

Jeffrey F. S. Neumann

Product Designer · Generative AI UX Innovator

Cleveland, OH · (440) 821-9949 · jfsn.com · jeff@jfsn.com

PROFESSIONAL SUMMARY

Product Designer and Generative AI Specialist blending 50 years of creative experimentation with advanced UX innovation.

I design intelligent, human-centered systems that merge art, AI, and interaction — elevating engagement, retention, and operational precision across fintech, government, and enterprise platforms.

Notable results include a **45% boost in fintech retention** through GPT-driven onboarding and a **25 % drop in HUD compliance errors** via redesigned workflows.

Passionate about using generative models (GPT-4, Claude) to turn complex systems into intuitive, emotionally resonant digital experiences.

CORE COMPETENCIES

AI Design & Automation: Prompt Engineering · LLM UX Patterns · AI Workflow Integration · Ethical AI Design

UX/UI Mastery: Human-Centered Design · Wireframing & Prototyping · Accessibility (WCAG 2.1) · Scalable Design Systems

Tools & Technologies: Figma (AI Plugins, Design Systems) · Adobe CC · HTML/CSS · Tailwind CSS · React · Jira · Notion

Collaboration & Leadership: Agile UX · Cross-Functional Team Facilitation · Stakeholder Alignment · Remote Design Ops

PROFESSIONAL EXPERIENCE

Product Designer & GenAI Specialist

Freelance / Remote — 2023 – Present

- Designed GPT-powered onboarding experiences that increased fintech user retention by **45%**.
- Developed Brand Brain (Unilever POC), integrating GPT-4 + Relume + Trickle APIs to automate global brand-asset creation — projected **40% boost** in brand consistency.
- Built modular, AI-enhanced design systems accelerating product launches by **25%**.
- Partnered with PMs and engineers to embed LLM-driven personalization into live products.
- Achieved a **90% client retention rate** through AI-first design strategy and communication clarity.

Design Consultant — CGI Federal

Cleveland, OH — 2014 – 2023

- Redesigned HUD Section 8 workflows for **340K+ users**, reducing compliance errors by **25%**.
- Led UX for **CGI Notify®**, an AI-prioritized emergency alert system adopted by 15 + U.S. agencies — cutting support inquiries by 30%.
- Directed UX/UI for **OnCue360**, an IoT + AI-integrated mobile inspection app improving field accuracy **20%** and reducing task time **25%**.
- Created accessible design libraries and data-driven prototypes for multi-agency deployment.

Principal Designer — OEConnection (OEC)

Richfield, OH — 2011 – 2014

- Designed mobile-first B2B quoting experiences driving **25% increase in adoption**.
- Built and implemented scalable component libraries reducing QA cycles by **50%**.
- Advocated for responsive design standards across enterprise product suite.

SELECTED AI-DRIVEN PROJECTS

Brand Brain (Unilever POC) — Created a GenAI platform fusing GPT-4, Relume, and Trickle APIs to automate brand-asset workflows — improving global consistency by 40%.

CGI Notify — Led UX for AI-powered alert routing platform; accelerated federal crisis response by ~80%.

CGI OnCue360 — Designed mobile inspection app combining IoT + AI image recognition — increasing operational efficiency and field accuracy.

CLIENT TESTIMONIAL

“Jeff’s AI-enhanced UX solutions were transformative, streamlining our design workflows and saving over 200 hours annually.”

— Jeff Adams, Director of Digital Strategy, CGI Federal

EDUCATION

Bachelor of Fine Arts – Industrial Design

Cleveland Institute of Art

Foundation in form, composition, and human-centered design — principles that continue to shape AI-driven product experiences.
